LAKEVIEW SELECTED FOR PROGRAM OF THE YEAR AWARD

KENOSHA, Wis. (Friday, Jan. 23, 2015) – LakeView Technology Academy has been selected to receive the Wisconsin Technology Education Association High School Program of the Year award.

This award provides recognition to a high school that delivers an outstanding program, which provides students with rigorous training and skill development in the areas and concepts of technology and engineering. It is only awarded to one school annually.

To be selected for the award, the school must first be nominated by a member of the school district. From there, the school is required to complete a WTEA checklist and create a presentation that showcases the different areas that reflect the school’s program approach. Then, each nominee is scored based on the required criteria for the award.

For their presentation submission, LakeView created a website, which highlighted examples of the program’s curriculum, which was developed by its tech department, examples of student work, interactive activities, review styles and projects, among other things. In addition, LakeView created a video tour of the school, giving an insight on what students have access to, how it is structured and the equipment that is used.

The submission also included letters of recommendation from administration, staff, students and parents, as well as media coverage of the school’s programs and links to all of LakeView’s after-school clubs and activities.

Members of LakeView’s Integrated Technology Education Department will be recognized at the WTEA awards banquet on Wednesday, March 25, 2015, at the Harley-Davidson Museum in Milwaukee, Wis.
In addition, Feb. 22-28 is National Engineers week, and February is Career and Technical Education month, which is a great opportunity to acknowledge the importance of programs like these. It also is an appropriate time to celebrate the efforts and accomplishments of the many students who are pursuing their CTE ambitions through KUSD’s pathways, as well as the excellence of the dedicated staff, who work hard to help these students reach their full potential.
