<b>Determining our Leading Measures</b>	All	Defining metrics around academic achievement – Where as a district should we be focused on relative to academic achievement. Example: What proportion of students (white, black, poverty, and special education) are achieving at the 50 <sup>th</sup> percentile (average performance)? 60 <sup>th</sup> percentile (state cut score for proficiency)? 70 <sup>th</sup> percentile (college and career readiness standard); lower than ??? (require additional resources/attention)? What are some leading measures that might suggest we are having an impact? Example: What percentage of minority students increased their reading performance in the last 45 days (compared to same period last year)?
